

Product Name :
Process Control Trainer**Product Code :**
POL-MEC0001**Description :**

Process Control Trainer

Technical Specification :**PH Ration Educational Equipment Industrial Training Equipment Overview**

This pH process control system is based on pH regulation training equipment, it is used for pH control education training. Control inspection system can meet boiler water quality automatic monitoring requirements, real time inspect boiler water PH standard requirements, real time auto test, accurate data collection, send to main control center, set CPU signal, CPU control add water, add acid, add alkali, . Through this system, students can learn boiler water acid- alkali, learn to use switch control value, learn pH control, manual adjust pH value, learn use 3 method adjust pH value.
