

Product Name :
Industrial Automation Trainer

Product Code :
POL-ATE0002

Description :

Industrial Automation Trainer

Technical Specification :

FMS is managed by computer, it is a high efficiency equipment to demo process middle and small components, it has the features such as: Multi standard manufacture unit, auto upload material mini CNC machines, whole set of material transmission system, PLC system, sensor technology, test technology etc.

Educational Training Equipment Technical Parameter

- 1, Control cabinet main circuit power supply: Single phase AC220V \pm 10% 50Hz
2. Air supply pressure: 0.5 ~ 0.6MPa
4. Dimensions: 7100x 4800x 1800mm

Educational Training Equipment FMS has the following unit

Distribution unit

Testing unit(use capacity sensor, inductive sensor, optical sensor, micro switch etc.)

Sorting unit

Mechanical handling unit

Mechanical up and down loading unit

CNC process unit

Processing testing unit

5 DOF robot assembly unit

Finished product unit

Bar code read processing unit

Three-dimensional warehouse to be automatic storage unit

Inverter adjust transmission unit

PC monitor unit

Engineering Lab China
