

Product Name :
Radius Bending Machine

Product Code :
CHINAELABC2720019

Description :

Radius Bending Machine

Technical Specification :

comes with a standard 2-speed drive motor, adhering to most safety requirements it is an efficient and quicker bender used for making circular rings.

Heavy-duty Radius Bar Bending Machine will radius up to 36mm rebar.

The Radius Bender has been designed with a guard for making rings in a safe operation.

Radius Bender is designed to bend radius rebar without the need to pre-bend the end of the bar.

After forming the ring, the finished shape is lifted out of the machine while the guard hinges and returns to the closed position.

The drive rollers do not rotate while the guard is open.

Keeping the operator's hands away from the forming rolls allows safe operation.
