

Product Name :
Solvent Recovery Unit

Product Code :
CHINAELABC2710030

Description :

Solvent Recovery Unit used to recover the solvent liquid after its use for the extraction tests.

Technical Specification :

An electric heater in the left-hand chamber distills the solvent, which then passes through a water cooling system and drops into the second chamber ready for re-use in a new test. Excellent for use in a wide range of bitumen and asphalt testing industrial procedures. It's the ideal tool for use in an bitumen and asphalt testing workshop and engineering lab.

This unit has been designed to recover non-flammable solvents and consists of two stainless steel chambers, one for dirty solvent and the other for the cleaned solvent.

Supplied complete with 10 m plastic tube, tube clamps, sieve insert 0.6 mm opening and one lid.

Once the process is completed, a temperature switch automatically stops the heating elements.

Power: 1200 W

Max. temperature: 150°C

Weight approx.: 17 kg

Overall dimensions: 400x320x650 mm
