

Product Name :
Cut Off Wheel Machine

Product Code :
CHINAELABC2570009

Description :

Cut Off Wheel Machine

Technical Specification :

This cutting machine is composed of main unit, electric control box, cutting room, motor, cooling system, cutting grinding wheel and other parts.

It comes with a cooling system to prevent overheating and burning during the cutting process.

Cutting speed can be set in accordance with the different specimen so as to improve the quality of cutting samples.

It can cut diameter of 80mm within the round workpiece, but also can cut rectangular specimens within the cutting of high 70mm, depth 100mm.

Also the operator can choose cutting style in manual and automatic.

It is more convenient for user to use because of the large cutting chamber and meanwhile it is s one of the sample preparation equipment of colleges and universities, factories and enterprises for metallographic test.
