

Product Name :
Orsat Gas Analysis Apparatus

Product Code :
CHINAELABC2510010

Description :

Orsat Gas Analysis Apparatus for Fuel Testing Lab Equipment from China

Technical Specification :

The analyzer set-up consists of the following components :

The following components are contained in the Versa Case III as shown above using the support brackets.

A liquid filled Leveling Bottle that is used to move the sample through the Burette and Pipettes.

Graduated Glass Burette which is water jacketed for temperature stability.

Three glass Absorption Pipettes containing absorbing reagents.

The three pipettes are connected to the 3 compartment bag, which is hung behind the pipettes, by way of the valves on the gas expansion bag.
