

Product Name :
Orsat Gas Analysis Apparatus

Product Code :
CHINAELABC2510010

Description :

Orsat Gas Analysis Apparatus for Fuel Testing Lab Equipment from China

Technical Specification :

The analyzer set-up consists of the following components :

- The following components are contained in the Versa Case III as shown above using the support brackets.
- A liquid filled Leveling Bottle that is used to move the sample through the Burette and Pipettes.
- Graduated Glass Burette which is water jacketed for temperature stability.
- Three glass Absorption Pipettes containing absorbing reagents.
- The three pipettes are connected to the 3 compartment bag, which is hung behind the pipettes, by way of the valves on the gas expansion bag.
