

Product Name :
Universal Milling Machine

Product Code :
CHINAELABC2530004

Description :

Universal Milling Machine

Technical Specification :

Universal milling machine is preferred for producing a vast variety of surfaces that may be a part of piece or serial production.

The machine is also bolstered with strength and rigidity & generates high power to achieve must faster operations than some of the other alternatives.

It is also possible to produce spiral surface with this machine.

The procedure of milling is carried out by making use of different types of milling cutters like cylindrical disc, end cutters, angular milling cutters, etc. As a result, this milling machine is able to accommodate surfaces that are horizontal, vertical, helical, groovy, fissure, and angular.
