

Product Name :
Basic Refrigeration and Air Conditioning Training System

Product Code :
CHINAELABC2560002

Description :

Basic Refrigeration and Air Conditioning Training System

Technical Specification :

The Basic Refrigeration And Air Conditioning Training System main components are compressor, condenser and receiver plus electrical and communications systems.

The models are plugged onto the base unit and connected hydraulically with refrigerant hoses and electrically with cables.

Self-sealing couplings reduce the refrigerant loss to a minimum.

All components are arranged well visible to allow their operation to be monitored.

The modern and powerful software is an integral part of the training system in the form of hardware/software integration (HSI).

It enables the comfortable execution and analysis of the experiments.

Temperatures and pressures in the system are recorded by sensors and displayed dynamically in the software for system operation and data acquisition.

The experimental unit is connected to the PC via a USB interface.

FEATURES:

Fundamentals of the refrigeration cycle

Fundamentals of air conditioning

Components in a refrigeration system/air conditioning system

System operation

Fault finding

Base unit for the setup of basic experiments in refrigeration and air conditioning technology

SPECIFICATIONS:

Condensing unit

Refrigeration capacity: 340W at 0/32°C

Receiver: 0,7L

Refrigerant currently available in the market

Filling volume: 700g

CO2-equivalent: 0,4t

Measuring ranges :

Temperature: 1x -50...50°C, 3x 0...100°C

Pressure :

1x intake side: -1...9bar

2x delivery side: -1...15bar

Required for operation :

230V, 50Hz, 1 phase

230V, 60Hz, 1 phase

Engineering Lab China
