

Product Name :
Automotive Electrics Panel Trainer

Product Code :
CHINAELABC0030070

Description :

Automotive Electrics Panel Trainer

Technical Specification :

This trainer provides students and instructors with the opportunity to demonstrate, investigate and fault-find a simulation of typical automotive electrical systems.
The trainer is designed to allow access to a variety of test points for vehicle electrical components, as well as provide an understanding of the overall system layout and configuration.
To facilitate the development of techniques in diagnostics and fault-finding skills, the panel includes a range of fault-insertion options to simulate typical real-world system malfunctions.
The optional automotive cloud-based learning resources also offer supporting material in the form of presentations, investigations and assessments to underpin the practical tasks carried out on the panel trainer.
Typical practical tasks include:-
Vehicle wiring
Battery and fuses
Starter and solenoid
Horn and relay
Light circuits:- front, side, rear, indicator, reverse, brake, hazard, vanity and interior lights
Electrical circuit diagrams
Electrical components
Electrical circuits
Electrical circuit faults, short-circuits, bad components
Electrical components and their symbols
Troubleshooting methods
