

Product Name :
Marsh Funnel with Measuring Cup

Product Code :
CHINAELABC2680043

Description :

Marsh Funnel with Measuring Cup

Technical Specification :

Viscosity is a determinant of the flow speed and thickness of the slurry and therefore also its strength characteristics.

Marsh funnel is a simple yet important apparatus to measure the viscosity of the slurry and other types of cement mixes.

Specifications :

A metallic funnel which is 12 inches in length and 6 inches wide at the top.

It is mounted on a vertical stand.

The tube is 2 inches long and has 3/16 inches diameter.

The cone tapers down and connects at the lower end with a drain tube that is made with high grade polymer plastic.

The total capacity of the closed cone is 1500 cc.
