

Product Name :
Drill Tool Dynamometer

Product Code :
CHINAELABC2550065

Description :

Drill Tool Dynamometer

Technical Specification :

FEATURES:

Rigid in construction & Sensitive transducing and amplifying system for accuracy in force measurement.
Compact two-channel digital force indicator.
Use of cutting fluid during operation is possible.

SPECIFICATION:

Mechanical Sensing Unit with Job Holder with strain Gauges mounted on it.
Balancing Potentiometer for initial balancing
Control panel housing digital force indicator to measure both forces simultaneously, balancing potentiometer, connecting cables.
Digital Force Indicator – two channel, to read both thrust and torque simultaneously.
Range – thrust – 0 to 200 Kg, torque – 0 to 20.0 Kg m, least count – 0.1 Kg m.
Necessary switches, fuses and screen-printed front plate.
The set up is calibrated at our works.
