

Product Name :
Geo synthetic Pull Out Resistance Testing System

Product Code :
CHINAELABC3210001

Description :

Geo synthetic Pull Out Resistance Testing System

Technical Specification :

This equipment is suitable to determine pull out resistance/interface shear resistance of Geosynthetic material in soil. It is suitable for testing 610mm x 460mm x 305mm sample containing soil and geosynthetic to evaluate soil to geosynthetic friction characteristics as per ASTM D6706. The unit provides variable rate of strain for shear/pulling load ranging from 0.0001mm/min.-9.9999mm/min.
