

Product Name :
Digital Load Frame**Product Code :**
CHINAELABC2690145**Description :**

Triaxial Setup - Digital Load Frame

Technical Specification :

It is an advanced version of mechanical load frames. In this load frame, rate of strain is controlled through combination of electronics and micro stepper / Servo motor. The unit operates on 220Volts 50Hz single phase supply.

Capacity of the load frame – 50kN

Vertical Clearance – 800mm

Horizontal Clearance – 325 mm

Platen Diameter – 150mm

Platen Speed – 0.00001-9.9999 mm/min
