

Product Name :
Automatic Mixture Blender

Product Code :
CHINAELABC4690002

Description :

Automatic Mixture Blender

Technical Specification :

Automatic mixture blender adopts advanced microprocessor controlling technology to present the blending temperature ranging from ambient temperature to 200. This automatic mixture blender can automatically control PID parameters and blending time, which is suitable to be used in the laboratory for the sample test.

Blending volume: 60L

Temperature control range: Room temperature~200

Temperature control accuracy: ± 5

Timing range: 0~999s

Timing accuracy: ± 0.1 s

Rotation rate of paddle: Rotation speed: 67 r/min Revolution speed: 42 r/min

Blending motor: 380V, 50Hz, 2200W, 1400r/min

Lifting motor: 380V, 50Hz, 750W, 1400 r/min

Overall dimension: 1400mmx750mmx2400mm

Power supply: AC (380 \pm 10%)V, 50Hz, 30A (three-phase four-wire system, with zero line)

Ambient temperature: -5~+50

Relative humidity: $\leq 80\%$
