

Product Name :
Automatic Wheel-Tracker Immersion Test

Product Code :
CHINAELABC480002

Description :

Automatic Wheel-Tracker Immersion Test

Technical Specification :

Wheel tracker is intended for evaluating the anti-rutting ability of asphalt mixture at high temperature and helping with the ratio design of asphalt mixture.

Working mode: Water immersion test and non-immersion test

Temperature measurement accuracy: $\pm 0.1^{\circ}\text{C}$

Ambient temperature control accuracy: $\pm 1^{\circ}\text{C}$

Number of temperature measurement channels: 2

Displacement measurement accuracy: $\pm 0.01\text{mm}$

Displacement measurement range: 0~30mm

Temperature setting range: 40°C ~ 80°C
