

Product Name :
Concrete Test Hammer 25mm

Product Code :
CHINAELABC4880002

Description :

Concrete Test Hammer 25mm

Technical Specification :

Concrete test hammer is intended for carrying out non-destructive tests on concrete structures. It gives an immediate indication of the compressive strength of the concrete using the calibration curve applied each hammer.

Measuring range: 10~60Mpa

Standard impact energy: 2.207Nm

Stroke of rebound hammer: 75mm

Friction of pointer slider: 0.5N~0.8N

Sphere radius of rebound pole (SR): 25mm±1mm

Average rebound value on steel anvil (Rm): 80±2
