

Product Name :
Pull-Off Adhesion Hydraulic Tester**Product Code :**
CHINAELABC5020002**Description :**

Pull-Off Adhesion Hydraulic Tester

Technical Specification :

Bond strength tester is a compact portable machine to test adhesive strength of decorative bricks, mosaics, plates, paints, surface coatings on its support and various exterior building materials on external walls. This pull-off adhesion tester also can test bond strength of external insulation materials.

Technical Parameters

Structure: integrated

Hydraulic cylinder stroke: 10mm

Display mode: KN, Mpa, switchable

Measuring range: 0~10kN

Resolution: 0.001kN

Peak hold: yes

Data storage: more than 500

Main material: high-strength aluminum alloy, lightweight material

Body weight: 2.0kg
