

Product Name :
Fatigue Testing Machine Dynamic Test

Product Code :
CHINAELABC5210001

Description :

Fatigue Testing Machine Dynamic Test

Technical Specification :

Fatigue testing machine is intended for dynamic test, cyclic life test at ambient temperature and other fatigue tests for various springs (high strength, high stress, special materials) and elastic components.

Frequency: 1-5Hz

Amplitude: 0-±50mmmm (can be customized)

Stroke: 0-100mm (can be customized)

Counter capacity: 9×10⁹ times

Spring diameter: OD??90mm

Free length of spring: 150mm

Vertical test space: 200mm (can be customized)

Size of working table: Designed as spring size and working position

Position number: Two-station, three-station, four-station, multi-station

Working power: 380V, 50Hz

Power of main power: 8kW
