

Product Name :
Bearing Plate test Apparatus

Product Code :
CHINAELABC5390004

Description :

Bearing Plate test Apparatus

Technical Specification :

Plate bearing test is used in earthworks and soil foundations to evaluate the composition and consequent deformability of the soil.

This gives an indication of the total load capacity of the soil under test.

Also used in road construction engineering.

Technical Parameters

Loading plate diameter: 300mm

Lifting jack loading range: 0 ~ 32T

Lifting jack stroke: 120mm

Measuring bridge span: 3000mm

Manual oil pump rated pressure: 70Mpa

Stress test range: 0 ~ 60Mpa
