

Product Name :
Determination of Carbonate In Lime

Product Code :
CHINAELABC5450024

Description :

Determination of Carbonate In Lime

Technical Specification :

The apparatus shall consist of the following components assembled as given

Funnel

Two-way cock

50-ml flask

Leveling bottle

Condenser tube

Water jacket

Compensator tube

Gas burette

Manometer

Sodium hydroxide bubbler

Valv and

Three-way cocks

The compensator tube is used to correct automatically for the changes in barometric pressure and temperature by balancing the pressure in the burette against that in the compensator tube.

The manometer is used when balancing the pressure in the burette against that in the compensator tube.
