

Product Name :
Special Weight Length Minus Tolerance Measuring Test
Equipment

Product Code :
CHINAELABC3700002

Description :

Special Weight Length Minus Tolerance Measuring Test Equipment

Technical Specification :

Safety barriers are installed at two sides of the working table to ensure the safety of operators.
Integrated with non-contact laser measurement, improving the precision and reliability of measurement data.
Specially developed measurement control system, featuring a high speed processing unit and a performance of high stability and precision.
Completely automatic measurement process. Place the component on the V-shaped bearing, press the measure button, and the measurement instrument will complete the measurement quickly. The measurement data are directly retrieved, displayed and saved by computer software.
Intuitive display of length and weight.
Support for saving, instant retrieving and inspecting measurement data.
Integrated with safety barriers, travel limit protection and full scale protection.

Length measurement range: 2001500mm
Length measurement accuracy: 0.2mm
Weight measurement range: 0.330kg
Weight measurement accuracy: Less than 0.5% of total weight
Sample diameter range: 550mm
Power supply: 0.5kW/AC220V/50Hz
Frame dimensions: 21807201175mm3
