

**Product Name :**  
1A Plane Frame With Strain Gauges

**Product Code :**  
CHINAELABC2860005

**Description :**

1A Plane Frame With Strain Gauges

**Technical Specification :**

Comparison of deflections with theoretical values assuming pin joints  
Comparison between normal and inverted trusses  
Measurement of strains in members of a fully welded truss  
Investigation of reciprocal theorem  
Strain gauging of welded structures  
The use of strain gauges and strain meters  
Comparison of deflections with theoretical values assuming pin joints  
Comparison between normal and inverted trusses  
Measurement of strains in members of a fully welded truss  
Investigation of reciprocal theorem  
Strain gauging of welded structures  
The use of strain gauges and strain meters

Specification of 1a Plane Frame With Strain Gauges  
Effective teaching experiment  
Real size welded truss  
Comparison with pin jointed design theory  
Verification of reciprocal theorem  
Provides influence lines  
A comprehensive instruction manual for students and lecturer provided.  
Must be used in conjunction with the 300 kN Universal Testing Frame, Hydraulic Ram System

**Engineering Lab China**
