Product Name :	
Electronic Fuel Injection	

Product Code : CHINAELABC2950002

Description :

Electronic Fuel Injection

Technical Specification :

Relationship between the duration of injector opening to the quantity of injected fuel Air temperature effect on the quantity of injected fuel Signal analysis with oscilloscope Injection time calculation with oscilloscope Injection time calculation with tachometer and dwell meter Valve position switch output signals Valve position sensor output signals Study of injector activation signal at various conditions Injection duration at various speeds, temperatures and engine loads

Oxygen sensor operation

Engineering Lab China
