

**Product Name :**  
Passive Safety Devices For Motorcars

**Product Code :**  
CHINAELABC2950005

**Description :**

Passive Safety Devices For Motorcars

**Technical Specification :**

Air bag (driver bag, passenger •bag, side •bag, window •bag)  
Safety belts tension relay  
Fuel shut off inertial switch  
Mult •function valve in the fuel tank

The different not acting safety devices are reproduced on the panel through a synoptic diagram that allows a complete analysis of the components and, in case, of the relevant electrical/electronic control circuit. It is possible to simulate the behaviour of components and circuits, on the basis of operating conditions that students and teachers can control directly on the panel or through the personal computer. The latter keeps constantly under control the simulation, by visualizing its behaviour by means of signals and analog and digital meters; in this way the student, through suitable measurements and tests, can proceed to the fault finding activity.
