Product Name:

Laminar Flow Meter Range Instrument

Product Code: CHINAELABC3300002

Description:

Laminar Flow Meter Range Instrument

Technical Specification:

Measure the air flow of the engine, hose, or leads Single or multi-cylinder engines Naturally aspirated or supercharged engines Research and development Air Compressors

Functionalities of Laminar Flow Meter Range Instrument:

Accurate measurement of flow

Ranges available from 25 to 650 liters per second

Can be used with pulsating flows

Not affected by elbows or bends in conduits

Verified Linear Characteristics

"Square Law" Errors eliminated by adjustment

Removable element for cleaning

Improved pneumatic damping at connections Pressure
