

**Product Name :**  
Heat Conduction In Gases and Liquids

**Product Code :**  
CHINAELABC3730004

**Description :**

Heat Conduction In Gases and Liquids

**Technical Specification :**

Study of the heat conduction of gases and liquids  
Experiments in annular gap formed by 2 concentric cylinders  
Experimental media water, oil, air  
Radiation portion of heat transfer negligible due to low temperatures and polished surfaces  
Adjustable electric heater  
Manual valves for flow rate adjustment (cooling water, medium to be investigated)  
Measuring amplifier with digital displays for temperature difference and heater power and control elements
