

**Product Name :**  
Electric Torque Wrench Learning System

**Product Code :**  
CHINAELABC3780006

**Description :**

Electric Torque Wrench Learning System

**Technical Specification :**

The Electric Torque Wrench Learning System includes an electric torque wrench, a 19mm box head drive, CD-ROM based student learning materials for both theory and lab, and teachers assessment guide.

The CD-ROM based curriculum includes virtual simulation of key skills, allowing learners to practice skills in advance of actually working on the equipment.

Electric Torque Wrench Learning System uses industrial quality components to help assure that students are better prepared for what they will encounter on the job and to withstand frequent student use.

The CD-ROM based curriculum can be accessed locally or web delivered, allowing businesses to increase delivery of high quality assembly practices in far flung organizations.

Features of Electric Torque Wrench Learning System

Teaches learners how to use a high-speed, precise torque tool

Industrial quality components

Hands-on skills
