

Product Name :
Instrumented DC Electric Torque Wrench Learning System

Product Code :
CHINAELABC3780008

Description :

Instrumented DC Electric Torque Wrench Learning System

Technical Specification :

The Instrumented DC Electric Torque Wrench Learning System teaches learners how to assemble a threaded fastener using a torque wrench.
These tools combine both speed and precision, making them a popular choice in today's workplace.

The Instrumented DC Electric Torque Wrench Learning System includes a tool panel with a DC right angle electric nutrunner, 19MM socket, 5M DS cable, control box, multimedia based student learning materials for both theory and lab, and teachers assessment guide.

The multimedia based curriculum includes virtual simulation of key skills, allowing learners to practice skills in advance of actually working on the equipment.

Instrumented DC Electric Torque Wrench Learning System uses industrial quality components to help assure that students are better prepared for what they will encounter on the job and to withstand frequent student use. The multimedia based curriculum can be accessed locally or web delivered, allowing businesses to increase delivery of high quality assembly practices in far flung organizations.

Features of Instrumented DC Electric Torque Wrench Learning System

Teaches learners how to assemble a threaded fastener using a torque wrench

Industrial quality components

Hands-on skills
