CHINALSCHOOLS8510006**Description :**

Polarimeter Suppliers in China

Technical Specification :

A second polariser located in the eyepiece is then rotated and the angle of rotation/extinction measured on the integral scale.

A simple, cost-effective polarimeter suitable for student use.

A monochromatic light shines through a polariser at the base of the polarimeter and through a sample tube containing the solution for testing.

Requires a standard DC power supply to power the light source.
