

Product Name :
Vacuum Pump

Product Code :
CHINAELABC2740070

Description :

Vacuum Pump

Technical Specification :

Vacuum pumps are used for a number of applications concerning, above all, De-Airing systems of water. Water vapour sucked by the vacuum pump and mixed with the oil, producing emulsion, may cause serious damage to the pump when in notable concentration.

Vacuum pumps can also be fit with a Vacuum gauge with pin regulating valve and bleed valve as our model (see accessories) unless a similar gauge is not fit to the equipment to be connected as for example Large size pyknometer.

For this reason it is important, for such applications, to propose a suitable de-airing system as the Air drying unit filled with the Silica gel (dessorbator salt) (see Air drying unit).

Laboratory Equipment and Accessories, tools, products and systems for engineering lab and engineering teaching vocational education. At Engineeringlabchina get practical educational equipment for Laboratory Equipment and Accessories schools and teaching staff. Buy wholesale China Laboratory Equipment and Accessories Manufacturers. Engineeringlabchina high quality Technical Education Equipment products at the best price from China. Laboratory Equipment and Accessories China, Experiment Equipment suppliers China, and factory in China
